Project Name : CEA/308 of 2020-2021

Sample Specimen : Sylhet sand.

Date of Sample Collection : Thursday, 01 April, 2021

| Sieve Size | Wt of<br>Material Retained (gms) | Percentage Matarial Retained (rounded) | Cumulative % Retained | % Finer | Remarks   |
|------------|----------------------------------|--|-----------------------|---------|-----------|
| #4         | 37.6                             | 9.4                                    | 9.4                   |         |           |
| #8         | 146.6                            | 36.65                                  | 46.05                 |         |           |
| #16        | 92.2                             | 23.05                                  | 69.1                  |         |           |
| #30        | 44.9                             | 11.23                                  | 80.33                 |         |           |
| #50        | 42.53                            | 10.63                                  | 90.96                 |         | FM = 3.94 |
| #100       | 28.88                            | 7.22                                   | 98.18                 |         |           |
| #200       | 5.89                             | 1.47                                   |                       |         |           |
| Pan        | 1.08                             | 0.27                                   |                       |         |           |
|            |                                  |  | $\Sigma = 394.01$     |         |           |

#### **Cautions:**

2.

- 1. Samples as supplied to the laboratory have been tested. The laboratory authority does not bear any responsibility as to the representative charecter of the samples to be tested.
- 2. It is recommended that the samples are sent in a secured and sealed cover/packet/container under signature of the competent authority.
- 3. In order to avoid fraudulent fabrication of the test results, it is recommended that all test reports should be collected by duly authorized person and not by the contractor/supplier.

## **Observation on Specimen(if any):**

1. The result is found high considering the properties of coarse sand FM 2.5. It seems to be a mixture of some small size pre-gravels or stone chips.
